Introduction

Made right here: We design/develop/manufacture/dispatch from right here in the UK

Daniel Mason (Managing Director) - John Mason (Director) - Thomas Blaseby (Production)

Miniature Railway Workshop Ltd., is a UK company manufacturing and retailing miniature railway products and components, developed and made at our workshop here in Nottingham.

We want to bring temporary miniature railways within reach of everyone, whether they have a large or small garden, or alternatively access to a large site for public events.

MRW is constantly looking for ways to help the miniature railway enthusiasts to enjoy their hobby, we strive to produce reliable and well designed products that you can trust to work well throughout their lifespan. The backbone of MRW is our Jubilee Portable Track currently available in 5" & 7¼" gauge but we are working behind the scenes to increase our range and also offer other products applicable to the Model Engineer and Miniature Railway Enthusiast.

Don't Just take our word for it!

"Track is great. Thank you"...."15 meters of fun"

We dispatched this order of track to its new owner just in time for his birthday, and we are really pleased to share these pictures of his railway- set up with loco and carriage.

Thanks again to Tim for the photos! It really makes it all worthwhile receiving pictures and feedback like this.

Photo and quote Tim Sargent / Owner

Jubilee portable track laid in minutes, and giving hours of fun.

2021 BROCHURE AND PRICE LIST

2 reviews · 8 photos

★★★★★ a week ago

Absolutely excellent service! I ordered a large quantity of 7 1/4" gauge track which arrived promptly and is made to the highest quality! Can't recommend MRW enough! Perfect for portable miniature railways such as mine, can't wait to start showing off the track at some GLMR events! Can't wait to see what they come up with next!

Photo and quote Patrick Allen / Owner / [GLMR - Portable Miniature Railway](#)

I went and collected this lovely stack of portable track from Miniature Railway Workshop! It was a dream to put together and quickly expanded the track onto the front drive 😊 just in time for Flair Light Railway's first visiting locomotive!

"Great service and a fantastic product 👍 loving my new portable track"

Photo and quote Foz Fosdike / Owner / Flair Light Railway

To see more reviews and leave one for yourself head to [Our Google Maps Page](#)

7 $\frac{1}{4}$ " & 5" Jubilee Track.

Jubilee Track is a portable range of 7 $\frac{1}{4}$ gauge track designed not only to be laid and taken up regularly, but also done so in a matter of minutes. All of the Jubilee Track panels supplied by Miniature Railway Workshop Ltd. are interchangeable, meaning that they can be laid in any order. The flexibility in their arrangement allows them to be exceedingly suitable for specific space applications, and you will be able to continue to expand your temporary railway with more track panels and points.

Locking bar

Jubilee Track panels easily slot together with the Rail-Joiner from each section slotting inside of the opposing track panel rail.

CAD render of Joining of Jubilee Track panels.

A "Track Panel Tie Bar" can be used to hold the sections together on curves where there is a chance of the sections parting with the passage of trains.

The Design

It is not the intention of the design to make a scale model of standard or narrow gauge track, but to make a reliable safe track that balances the constraints of scale against safety and produces a design that is fit for purpose.

Transport and storage

The track panels are designed for easy transport, being an appropriate size to fit in most estate cars, trailers and vans.

The panels are lightweight being less than 7kg each, (points and other panels may weigh more). The panels also stack easily to keep the space required to a minimum.

7¼" gauge Range

Straight Portable Jubilee Track Panel

1.49m. track panel, 1.71m with fishplate.

Dimensions: 370mm wide, 47mm tall

Weight 6.8kg (approx)

7 1/4" Gauge Price Per Section	£58.00
-----------------------------------	--------

As standard, all MRW Jubilee track panels are widened by 2.3mm [3/32"]. This allows for curves to be joined to straights. This widening is within the 7¼ Gauge Society standards and should not adversely affect running.

The Jubilee portable track slots together very quickly which means an entire railway can be built in just minutes, providing a temporary back garden railway that can be laid - used - taken up all in one day and return the garden to normal. Also, with MRW's range of straights, points and curves your track can be changed at will so you can construct a different layout design almost every time. Finally, if you or your club wish to attend the local fete then the Jubilee portable track is the ideal solution, being quick and easy to assemble.

We have a great video of the track being laid here:

[Build Your Own Miniature Railway In Just 3 Minutes](#)

Buffer Stops 7 ¼ gauge Portable Jubilee Track

The narrow and standard gauge buffer stop conforms with the 7 ¼ Gauge Society standards.

Length 543.5mm Total Height 197.7mm
Conforms with 7 ¼ gauge society standards
Weight 3.5kg (approx)

7 1/4" Gauge Buffer Stop Price Per Item	£46.00
--	--------

The buffers are made from the same box steel used for the rails and are of sturdy construction to take the impact of a train at low speed.

Although we hope that you never need to use the buffer stops for the purpose of stopping a train, we have some recommendations in case it should happen.

A full explanation of how best to use the buffer stops is covered on Page 11 of the Operating Manual available for [download on the website](#)

Photo left: Patrick Allen GLMR

{available via quote}

7 1/4" Gauge Price Per Section

Angle of curve: 8.4 degrees £67.00

Angle of curve: 2.8 degrees £48.00

See Website for full size diagram.

Complete circle / 360 degree loop requires :
[42 x 8.4 degree sections] + [2 x 2.8 degree sections]

U Bend requires / 180 degree turn:
[21 x 8.4 degree sections] + [1 x 2.8 degree sections]

Right angle requires / 90 degree turn:
[10 x 8.4 degree sections] + [2 x 2.8 degree sections]

A Radius Points 7 ¼ gauge Portable Jubilee Track

These points are 50 foot radius to match our (A) radius curves for use with both standard gauge and narrow gauge loco's/rolling stock. The two halves of the points weigh 15kg and 17kg respectively making them an easy 1 person lift. Fitting the tie bar you can be sure that the panels stay locked together during use.

Length 543.5mm Total Height 197.7mm
Conforms with 7 ¼ gauge society standards
Weight 32kg (approx)

Left or Right Hand 7¼"
Portable Points

£440.00

For more info on the [Point Lever - Fully Trailable](#) see product listing.

5" gauge Range

Straight Portable Jubilee Track Panel

1.49m. track panel, 1.71m with fishplate
Dimensions: 370mm wide, 47mm tall
Weight 6.8kg (approx)

5" Gauge Price Per Section	£56.00
-------------------------------	--------

This is the 5 inch version of our popular 7¼ gauge Jubilee track panel. These panels share the same 25x25 box steel section and plastic wood sleepers as their larger 7¼ counterparts but are well proportioned to give a track panel that "looks right" and gives adequate stability for passenger carriage.

5 Inch is well suited for back garden applications as the locomotives are smaller and easier to lift/handle. We recommend for most public carriage that 7 ¼ gauge will give better stability.

In Development

As part of our product range, we are working to add standard curves and points in 5 inch gauge. These will allow you to build passing loops etc, with only a few types of panel.

Curved Portable Jubilee Track Panel

The curved section will match the points in radius and will be approximately 1.49m long

5" Gauge Price Per Section	TBC
----------------------------	-----

We plan to offer multiple radiuses in 5 inch as standard so more will be released through the coming months/year.

Portable Jubilee Points

5" Gauge Portable Points	TBC
--------------------------	-----

To complement our standard curves we will also offer points in 5 inch gauge. As of yet, we need to confirm more basic details about length/size before we can release any more information. To keep up to date with developments be sure to sign up to our Mailing List on the website or follow us on [Facebook](#).

We will be opening up for pre-orders so drop us a message if you're interested in being one of the first to receive this 5" product range.

Buffer Stops 5 Inch Gauge Portable Jubilee Track

This narrow and standard gauge buffer stop which conforms with the GL5 Association standards.

Length : 0.43m. track panel,
0.54m with Fishplate

Dimensions: 388mm wide, 177mm tall

Weight 3.5kg (approx)

5" Gauge Buffer Stop Price Per Section	£45.00
---	--------

The buffers are made from the same box steel used for the rails and are of sturdy construction to take the impact of a train at low speed.

Although we hope that you never need to use the buffer stops for the purpose of stopping a train, we have some recommendations in case it should happen.

A full explanation of how best to use the buffer stops is covered on Page 11 of the Operating Manual available for [download on the website](#)

Above Diagram: Buffer stop connected to track panels with "Track Panel Tie Bar".

Red arrows show force applied by the heavy impact of a train.

Blue arrows show the movement of the track panel at the joint.

**Order more than 30 sections of track
and receive a 5% discount!**

Tel: 07591 006642

Custom Radius Curved Track Panels

We can produce curves in almost any radius and to any gauge. It is best for delivery and handling that a track panel is around 1.5m long for this reason we will discuss with you the best trade off between section length and radius to achieve the curve you desire.

For all custom curves you need to contact us directly for a quotation and we can then produce a technical drawing for the panel you have requested.

Every panel we make is produced in a custom made welding Jig to ensure good alignment of the components and reduce manufacturing time which in turn then passes savings on to you.

The cost for custom panels will be similar to the standard panel but there may be a surcharge due to the set up time required. This will be calculated at the time of quotation.

5" & 7 1/4" Multi Gauge Track Panels

Straight Portable Jubilee Track Panel

1.49m. track panel, 1.71m with Fishplate
Dimensions: 370mm wide, 47mm tall
Weight 7.9kg (approx)

5" & 7 1/4" Gauge Price
Per Section

£71.00

After some popular demand these multi-gauge track panels are now available for purchase. These join directly to our 7 1/4 inch gauge jubilee panels and our 5 inch gauge panels.

Universal Track Components

These items can be used across all gauges and are interchangeable.

Track Panel

Recommended use of locking Joining piece to hold track sections together especially buffers and curves. Can be used with 7¼" 5" and dual gauge track sections.

On straight sections of track the likelihood of sections becoming detached is very minimal and the tie bar really is not needed. On curves, points and buffer stops where trains may cause the track to separate the tie bar is recommended to ensure your railway stays firmly connected.

Tie Bar, Price Per Item	£2.00
-------------------------	-------

Point Lever - Fully Trailable

The point lever attaches to the side of the portable points and is designed to be "Fully Trailable" this means a train can trail through the points when they are set against it without damaging the point blades or mechanism. The force to hold the blades in place can be adjusted by moving the weight up and down the lever and the whole assembly can be attached to either side of the points within a minute.

Price Per Lever	£78.00
-----------------	--------

Want to join the Jubilee Track to another type or rail?

We offer a range of options to join your Jubilee track to other portable rail types or to connect to a permanent railway. All of the joiners we have made so far have been straight but we can also make curved versions and costume sizes to suit your needs.

Permanent Joining Panel 5" & 7 ¼" Gauge Jubilee Portable Track

Left photo: Panel in situ sent to us by our happy customer.

We make custom track panels to join our Jubilee track to other rail types. The joining track panels are the same size as our standard straight section but with the rail changing midway to match that of your choice. *These products are made to order and are purchased with a 25% non refundable deposit.*

Description	7¼" Gauge	5" Gauge
Flat bar steel	£85.00	£80.00
21mm Profile rail	£90.00	£85.00
Other Profiles please Contact us	POA	POA

Semi-Permanent Joining Panel 5" & 7 1/4" Gauge Jubilee Portable Track

This product allows MRW portable Jubilee track to be joined to permanent track in a 'semi permanent' joint.

Connect your MRW Jubilee Track Panel to your permanent railway with this product. This panel gives a smooth and reliable joint between profiled rail commonly used on permanent tracks to our Jubilee track range. The profile rail is firmly clamped in place with locking plates and bolts. A hidden bolt under the rail to allow for fine height adjustment, see tech drawing on website for more info.

1.49m. track panel, 1.6m with Fishplate
Dimensions: 370mm wide, 47mm tall
Weight: 8kg (approx)

Description	7 1/4" Gauge	5" Gauge
16mm Profile rail	£95.00	£90.00
21mm Profile rail	£95.00	£90.00

The Aluminium rail is clamped into position using the plates on each side and can be carefully aligned to ensure a smooth joint. Consideration has been given to the aluminium rail wearing and hence fine adjustment to the height of the rail can be set with a countersunk bolt hidden under the rail.

These products are normally kept in stock with no deposit required if ordering less than 30 sections in total.

Loading Ramp For Jubilee Portable Track

The loading ramp is designed to move locos and rolling stock on and off permanent tracks and onto the Jubilee track sections. The ramp is made so that the wheels of the train can be rolled up the wedge shape and onto the box steel. The loading ramp then joins directly to standard Jubilee portable track sections.

1.49m. track panel, 1.6m with Fishplate
Dimensions: 370mm wide, 47mm tall
Weight: 9kg (approx)

Loading Ramp Per Section	7¼" Gauge £135	5" Gauge £130
-----------------------------	-------------------	------------------

The wedge is Mild Steel welded construction and supplied ready to use.

Alignment of the wedge shape is critical when using the ramp. It is necessary that the ramp is properly situated and aligned with the rails it is resting on, Full details about operation are shown in the [Operating instructions](#)

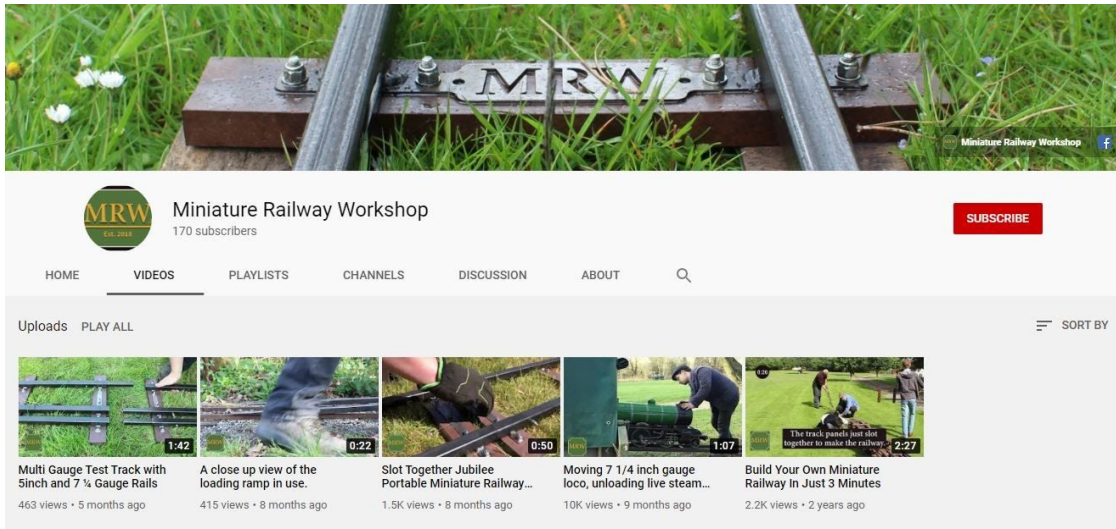

Video: [Moving 7 1/4 inch gauge loco, unloading live steam miniature locomotives MRW portable track.](#)

These products are normally kept in stock with no deposit required if ordering less than 30 sections in total.

Product Range

Further information about Jubilee track

Head over to [Miniature Railway Workshop's Youtube Channel](#) to see footage of the track being laid and used!

Technical

Technical drawings for products supplied by MRW. For the majority of products supplied we have made a simple technical drawing showing its size and important information. If there is a particular size or specification you need clarification on please do contact us and we will do our best to help.

Technical Documents and Operating Instructions, available for each Jubilee Track component.

As standard we supply simple to understand technical drawings so you know exactly what you're buying and can check fitment before placing an order.

For all our technical drawings head over to www.miniaturerailwayworkshop.com/technical

Our guarantee

We use our in-house designed and manufactured jigs to ensure the precise alignment of every section but if you should have any problems we ask that you contact us and we will be happy to help. The Jubilee Track will have been assembled in our workshop prior to dispatch to ensure the alignment and we will often run a wagon over it to ensure we are happy with every single section before dispatch.

Return & Refund Policy

We offer a 14 days return policy, provided the item is in the same condition that it was sold in. We will refund the price of the items less delivery.

Note; buyers pay return delivery costs.

For More info on our [Terms & Conditions](#) Head to our Website

What do our customers think?

As you can see I just have to remove a couple of sections to get the caravan out 😊

D. Docking

It's a fantastic product, it would satisfy the needs of both the novice and experienced model engineer. It's easy to assemble and store. It can be used for a variety of projects both large and small.

Robert Ewles / Chairman / Top Field Light Railway

Yes, It Will Rust!

The track is designed to be lifted when not in use and stored inside to minimise rust, but we wanted to test how it would behave outside for a prolonged period. This section (on left) has been outside through the winter for 12 months. It has some surface rust but is still very usable.

However, we do recommend that you lift your MRW Jubilee track when not in use in order to prolong its working life.

On leaving MRW the steel has been coated in oil, this is classed as a carcinogenic and the user should avoid contact with skin/eyes and ingestion.

We have chosen not to paint the rail as this would quickly wear away with the passage of trains if you do feel keen enough to paint the steel work when you first buy some MRW Jubilee track, then you can detach the sleepers and give the steel a good coating in paint.

Please remember if your track does pick up some surface rust this should be monitored by the operator to ensure that this rust does not become excessive and impair the structural integrity of the track panel. For more info on the use of the track take a look at the [operating instructions](#)

Our products get better with age and use.

Just like a fine loco, our track gets better with age and use. Our products are designed to be used regularly and give reliable service.

Thanks to [Alex Skelton](#) for producing this artwork. Copyright MRW 2021

Stock Materials

Plastic wood

Plastic wood is a long lasting solution for sleepers, it drills and cuts like wood and has a similar weight. It is an ideal choice for portable railways as well as permanent. This is a realistic and sustainable alternative to traditional hardwood sleepers. It doesn't need preserving prior to installation and is **100% recycled and fully recyclable**.

Plastic Wood

Dimensions 20mm x 60mm x 1500mm (1.5m)
Weight 1.70kg per 1.5m length.
Each 1.5m length when cut will give four 7 ¼ gauge sleepers.

Price per length	£4.50
------------------	-------

Plastic wood can be cut to length and costs quoted on request.

EN8 Round Bar

EN8 is an engineering steel, also known as 080M40. EN8 is the ideal choice for many model engineering operations where a bright finish is required and wear and strength are both considerations. It is a harder metal to machine/turn than normal mild steel but has much better wear resistance making it an ideal choice for locomotive/carriage axles. EN8 is also widely used for locomotive wheels and can be hardened/heat treated to add wear resistance.

It is suitable for Shafts, stressed pins, key's and various other applications.

Weight:

10mm diameter 0.38kg per 60cm length

8mm diameter 0.24kg per 60cm length

6mm diameter 0.14kg per 60cm length

Postage is calculated by weight, please consult postage table to better understand the postage price

Loading Ramp Bracket Kit

(Ramp Not supplied)

MRW have used this design of bracket for loading ramps, trolleys and in front of the storage container at Top Field Light Railway (above right). The hook form means that they can pivot slightly making joints more accommodating of changes in height.

We have used the brackets with 30x60x5mm unequal steel angle. although we leave this up to you to decide what you wish to mount the brackets onto.

Suitable for 7¼" and 5" gauge.

Bracket size: 200mm x 50mm 6mm laser cut Mild steel

Pack of components includes:

- Two laser cut brackets
- 4 x M12 Nuts and bolts
- ¾ Inch bright steel bar for location purposes.

Weight 1.2kg (approx)

Kit Price	£35.00
-----------	--------

Couplings

MRW supplies a range of couplings In stock and ready to dispatch.

MRW coupling bars suit all sizes of miniature trains from 3 1/2" gauge up to 10 1/4".

<https://www.miniaturerailwayworkshop.com/shop>

Please note that we aim to dispatch these items the next day. If purchased with a long lead time product, we will hold this item and dispatch as one order-unless otherwise agreed.

Coupling Bars

Left & Middle Photos: Supplied by customer in use at home railway

Medium duty 9mm Hole Mild Steel Coupling Bars

Hole size is cut at 9mm diameter for use with a 8mm pin.

Made from 6mm thick Mild Steel - Laser Cut.

Heavy duty 11mm Hole Mild Steel Coupling Bars

Hole size is cut at 11mm diameter for use with a 10mm pin.

Made from 8mm thick Mild Steel - Laser Cut.

	Medium duty 9 mm Hole 6mm thick Mild Steel	Heavy duty 11 mm Hole 8mm thick Mild Steel
Hole center spacing	Price and availability	Price and availability
60mm	£2.40	N/A
80mm	£2.60	N/A
100mm	£2.80	£3.80
140mm	N/A	£4.20
150mm	£3.20	N/A
160mm	N/A	£4.40
180mm	£3.60	£4.60
200mm	N/A	£4.80

Coupling pins

The heads of the coupling pins are designed to be comfortable to hold, but still small enough to fit close up to buffer beams and other couplings. The heads have been CNC-turned in the UK and the parts are assembled onto their shanks through finishing processes by MRW. We are really proud to be expanding our range with products produced right here in the UK.

Diameter Options (mm): 8, 10.

Length Options (mm): 60, 80.

Length refers to the usable length of the pin not the total length

Weight (KG) : 0.2 (approx)

Plain Coupling Pins

Coupling pin with retaining clip suitable for miniature ride on railways. These pins are ideal for use with both passenger and goods trains where you want a strong reliable joint between rolling stock and locos.

Weight Each (KG) : 0.05 (approx)

Material: Mild Steel with Zinc plating.

	8mm Diameter	10mm Diameter
Quantity	Price and availability	Price and availability
1 off	£1.50	£2.00
8 off	£10.50	£14.00

Please note these pins are not made by MRW but are supplied to us by a local firm

Adaptor Plate For Couplings

This is a product our customers requested and is a safe method of coupling standard gauge hook and buffers to narrow gauge style slot and pin couplings. Many clubs run with multiple coupling types hence a method of coupling these two common types comes in handy.

Product is designed to accommodate a 10mm pin although will work with a 8mm pin.

Material: Mild Steel - Mig Welded construction, and fully painted in black paint.

Note: no pins or chain are supplied with this adaptor plate.

Price per item	£36.00

Locations

We have moved!

MRW is now based from Nottingham for all production and sales, this is a massive step forward with much more room to expand and grow. Thanks for your continued support and we hope to welcome you in the future for collections and open days when the restrictions allow.

Miniature Railway Workshop,
The Tennant Building, Unit 7A, The Midway, Lenton, Nottingham, NG7 2TS.

What's Next?

We are working to develop more products to expand our range to include more gauges and track components. We are also looking to offer more products outside of our current offering that would be of interest to the model engineer. If you have a product that you would like to see us make we would welcome you getting in contact with us.
